DevOps Engineer (F/M/D)

This position is based in Rennes, France.

Our DevOps team is getting stronger as our self-hosted, full-as-code Kubernetes infrastructure is gaining is growing! This is why we are looking for new people to join our project.

Our day-to-day objective is to package, automate and operate the business applications and middleware of the IDnow solution in SaaS mode.

Main Role and Tasks

- Automating and improving the deployment of middlewares and IDnow business applications, mostly based on Ansible playbooks

- Operate, supervise and maintain in operational conditions those applications in production. As such, you will participate in N3 on-call duty

- Improve and maintain the CI chain, and will work as support the Development and QA teams in deploying and validating their applications

- Write the technical documentation and the procedures required for security audits

We Offer

- Up to 2-days of remote working per week

- Flexible work time with a core hours system

- 20 additional days of workation: Work remotely from anywhere in France

- 12 additional days off

- Access to an e-learning platform

- Health insurance

That Describes You

- **At least 3 years' experience in a DevOps-oriented position**

- Good knowledge of **Ansible**, **Gitlab-ci** or **Jenkins**, and would like to learn about **Kubernetes**

- You appreciate the "as code" approach, so you like to test your code

- Keen to learn new technologies, especially when it comes to adapting them to a high-security context

- Good writing skills, especially when it comes to as-code documentation

- You like teamwork, you're always ready to help a colleague, to do code reviews and to ask for them, and you easily share your good ideas with other team members

- **Good level of written and spoken technical French & English**

Our Recruitment Process

- First call with the Talent Acquisition Specialist (30 min - video call)

- Second interview with the Hiring Manager and someone from the team (1h - video call)

- Use case to prepare at home (1 week)

- Technical interview based on your work with the Hiring Manager and someone from the team (2h - on-site is preferred)

- 50% reimbursement of public transportation subscription

- Bonus for green mobility

- Lunch allowance of 8€ per day, reimbursed 60%

- The opportunity to participate in the development of innovative products that impact the public across Europe.

IDnow applies the principles of non-discrimination and equality: We strive to establish, maintain, and promote an open and inclusive recruitment process and working environment by respecting the principles of equal opportunities. Including but not limited to: sex, race or ethnic origin, religion or convictions, gender identity, citizenship, marital status, disability, age, or sexual orientation.

Challenge accepted?
Then I'm looking forward to hearing from you!
