

IT System Administrator (f/m/d)

This position is based in Rennes, France

IDnow France is strengthening its in-house IT team and is looking for its future System Administrator. As part of a team split between France and Germany, you will be involved in MCO and technical implementation.

Main Role and Tasks

This is a truly multi-skilled position covering a wide range of technical subjects: internal infrastructure, workstations, technical environments (Linux/Windows), security projects, etc. Here are a few examples:

- Support for overhauling and securing the internal IT infrastructure
- Participation in IDnow inter-team projects (France, Germany & Romania)
- Implementing common tools and processes at group level
- You will be responsible for maintaining the internal IS in operational condition:
- N1/N2/N3 support for internal incidents

We Offer

- Up to 2-days of remote working per week
- Flexible work time with a core hours system
- 20 additional days of workation: Work remotely from anywhere in France
- 12 additional days off
- Access to an e-learning platform
- Health insurance
- 50% reimbursement of public transportation subscription

MCO of internal IT tools (Microsoft Active directory, LDAP, Microsoft Azure, MS O365, JIRA, Confluence, Gitlab, etc.)

- Administration of the company network (firewall, wifi, etc.)

- Bonus for green mobility
- Lunch allowance of 8€ per day, reimbursed 60%
- The opportunity to participate in the development of innovative products that impact the public across Europe.

That Describes You

With at least 3 years' experience in a similar position, you are organised and a good communicator and are used to working in a team.

With a good level of French and English (C1 written & spoken), you feel able to work in an international context.

The technical skills required are as follows:

- Mastery of Linux "Debian/Ubuntu" & Windows "10/11" environments.
- Experience of hosting and infrastructure issues. Knowledge of networks, routing, switching and firewalls.

Experience we would like to see (but which can be improved / acquired):

- Virtualisation environments: Proxmox
- Desktop management tools: Puppet, Salt and/or Intune
- Experience in an ISO27001 environment

Our Recruitment Process

- First call with the Talent Acquisition Specialist (30 min - video call)
- Second interview with the Hiring Manager and someone from the team (1h - video call)
- Use case to prepare at home (1 week)
- Technical interview based on your work with the Hiring Manager and someone from the team (2h -

IDnow applies the principles of non-discrimination and equality: We strive to establish, maintain, and promote an open and inclusive recruitment process and working environment by respecting the principles of equal opportunities. Including but not limited to: sex, race or ethnic origin, religion or convictions, gender identity, citizenship, marital status, disability, age, or sexual orientation.

Challenge accepted?

Then I'm looking forward to hearing from you!

on-site is preferred)
