

Team Lead Frontend ReactJS (f/m/d)

Leading a small team of Frontend developers (4-5 people) under the Director of Engineering Web & Mobile, you will be involved in the development of our identity verification solution. You will collaborate with the Research, Product, Production and Customer Support teams.

Main Role and Tasks

- Lead the Frontend team in both human management and tech decisions : the role is approximately 50% management and 50% code (may vary depending on active projects and workload)
- Interface efficiently with other teams on common projects and workshops
- Participate in the formulation of requirements
- Create components (UI/UX), taking care to analyze user behavior to guarantee application ergonomics (responsive SPA applications).
- Deliver quality, robust and tested code in a continuous integration environment
- Maintain your knowledge with a regular technology watch in order to get involved in technological choices and continuous improvement actions.
- Participate in the recruitment of new collaborators or contractors

We Offer

- Up to 2-days of remote working per week
- Flexible work time with a core hours system
- 20 additional days of workation: Work remotely from anywhere in France
- 12 additional days off
- Access to an e-learning platform
- Health insurance
- 50% reimbursement of public transportation subscription
- Bonus for green mobility
- Lunch allowance of 8€ per day, reimbursed 60%

Our Tech Stack

- ReactJS framework
- Javascript-oriented ecosystem
- HTML/CSS/Typescript/Vite
- Continuous integration: Sonar, Jenkins, Gitlab

That Describes You

- Minimum 5 years' experience in Web development, including 3 years' experience with ReactJS
- Successful first-time experience leading a frontend team on similar stakes and in a similar environment (at least 1 year)
- Aware of mobile, responsive and modular development issues
- Team spirit, good interpersonal and learning skills
- Willingness to build, optimize and develop an innovative solution
- Strong UI / UX sensitivity
- Strong French and English skills

Even better if you know:

- Figma tools
- Redux
- Java/Springboot
- Agile team experience
- Participation in open-source projects
- Knowledge of Docker

Our Recruitment Process

- First call with the Talent Acquisition Specialist (30 min - video call)
- Second interview with the Hiring Manager and someone from the team (1h - video call)
- Use case to prepare at home (1 week)

- The opportunity to participate in the development of innovative products that impact the public across Europe.

IDnow applies the principles of non-discrimination and equality: We strive to establish, maintain, and promote an open and inclusive recruitment process and working environment by respecting the principles of equal opportunities. Including but not limited to: sex, race or ethnic origin, religion or convictions, gender identity, citizenship, marital status, disability, age, or sexual orientation.

Challenge accepted?

Then I'm looking forward to hearing from you!

Apply Now!

- Technical interview based on your work with the Hiring Manager and someone from the team (1h - on-site is preferred)
